

## Products For Patching Walls – Nail Holes

**Dap Lightweight Spackling**

**Behr Ultra Pure White (Satin)**

1. Fill hole/chip with light-weight spackle.
2. Wipe off any excess with a damp cloth.
3. Let spackle dry & then paint over hole.

**Use paint to touch up doors, edges or walls after moving furniture or etc.**

**Using any other products will not match and cause more work & expense to repair.**

**(i.e.: oil base caulking or spackle and another company's paint trying to match color)**
